

MY CHEVY

Texans on why
they drive a Chevy

Chevy Tahoe. Best-in-class fuel economy.

"Clients see my truck and say 'wow, this is nice'. My Tahoe is wonderful."

Katy resident Erica Benitez-Rico has a challenging Houston commute (managing her advertising agency) and two busy kids (soccer, baseball, field trips). With so much riding on her wheels, Erica treasures her Tahoe. "I owned a Chevy before and was completely in love with it. I tried a different brand and could not wait to get back into a Chevy. There is a huge difference in comfort, the way they drive, the way they look."

The fact that Tahoe is also best-in-class in fuel economy is another plus. With Active Fuel Management™ technology from GM, the LTZ's standard Vortec 5.3L V8 engine delivers power when you need it, automatically switching from four to eight cylinders. Switching gears smoothly—something Erica Benitez-Rico and her Tahoe both do with style.

Erica Benitez-Rico
KATY, TEXAS

• The E85 FlexFuel Vortec 5.3L V8 engine operates on either regular unleaded gasoline or E85—a blend of 85% ethanol and 15% gasoline—or a combination of both. E85 is a cleaner-burning fuel source, which helps reduce smog-forming emissions.

• The Vortec 5.3L V8 engine available in Tahoe achieves best-in-class fuel economy.

• Tahoe Hybrid available; named *Green Car Journal's* 2008 Green Car of the Year®.
